

BIBLIODAM - AI POWERED DIGITAL MEDIA WORKFLOW AND MANAGEMENT

Enhance your media assets in an AI and ML-enriched
cloud media workflow platform geared towards

P T
SPORTSUITE

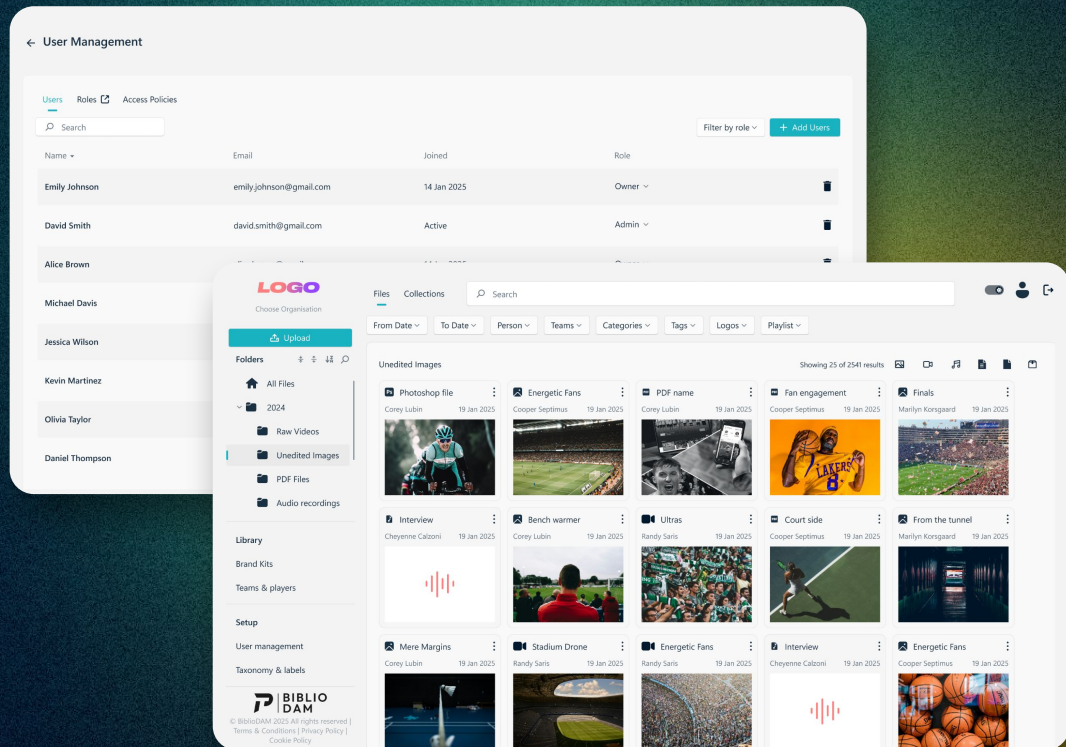

PT SportSuite's BiblioDAM is the future of digital media intelligence in sports. Designed and built in collaboration with leagues, tournaments, federations and clubs that demand smarter, faster, and more secure control over their sports media.

With custom and tailored AI automation, seamless web integration, and enterprise-grade security, BiblioDAM ensures that your media is always organised, accessible, and ready to power your brand.

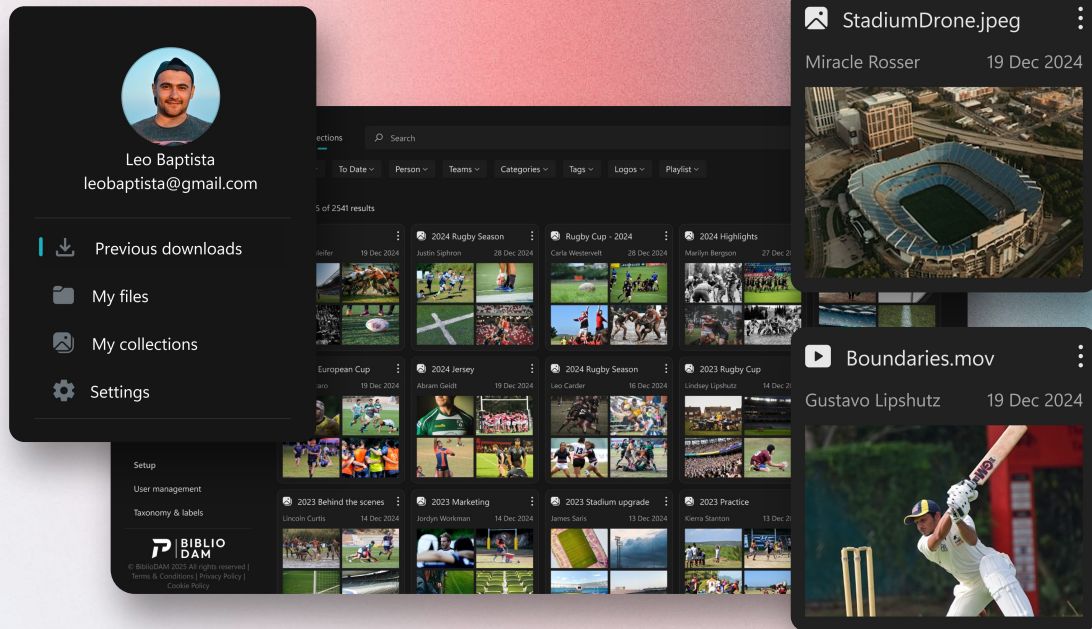

Access your media- anytime, anywhere

Being a professional sporting body means publishing content to a dedicated community of fans 24/7, 365 days a year. Sporting news can happen anywhere, and at any time, meaning you need instant access to your digital media assets, no matter where you are in the world.

Consolidated view of media archive

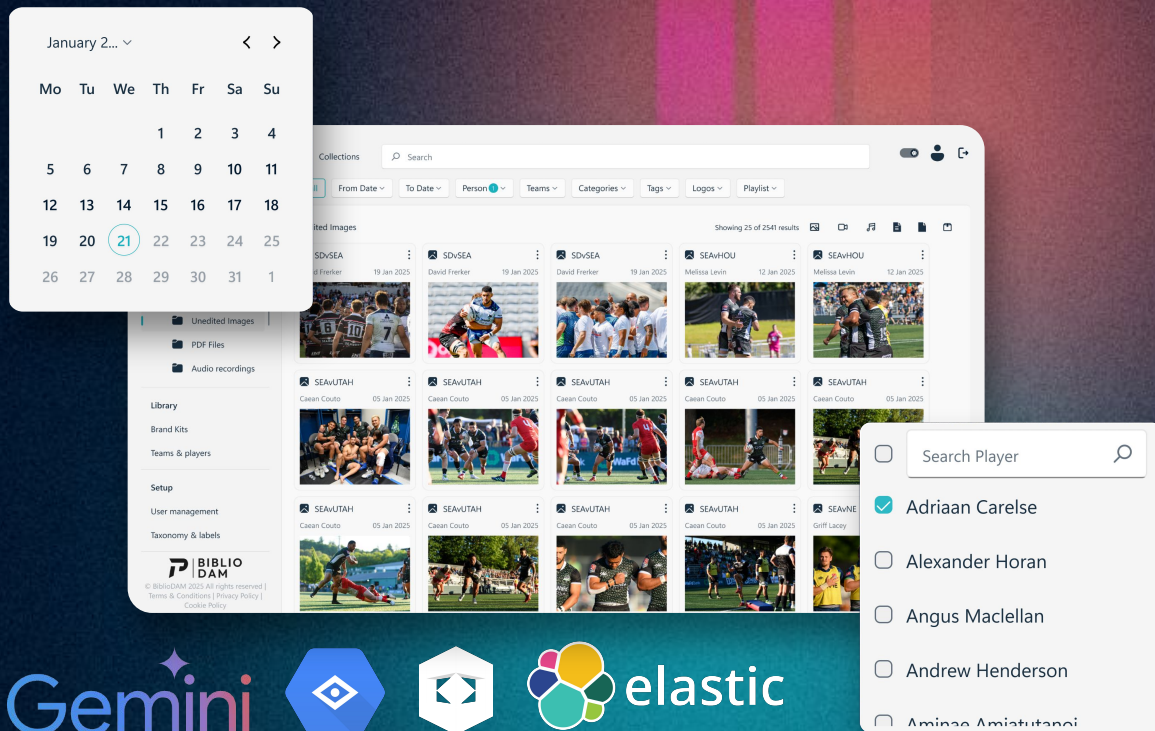

Let us migrate your media archive into PT's cloud environment, providing a single, streamlined view to all stakeholders for unparalleled accessibility and control

COMPONENTS

Advanced search technology

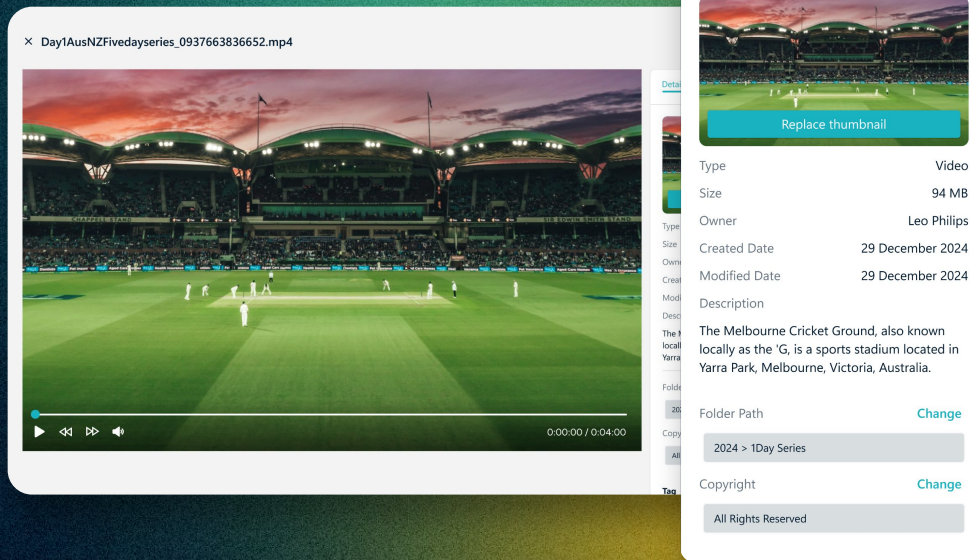

Experience lightning-fast, precision search capabilities, enhanced by the power of AI and machine learning

COMPONENTS

Real-time ingest - direct from broadcast

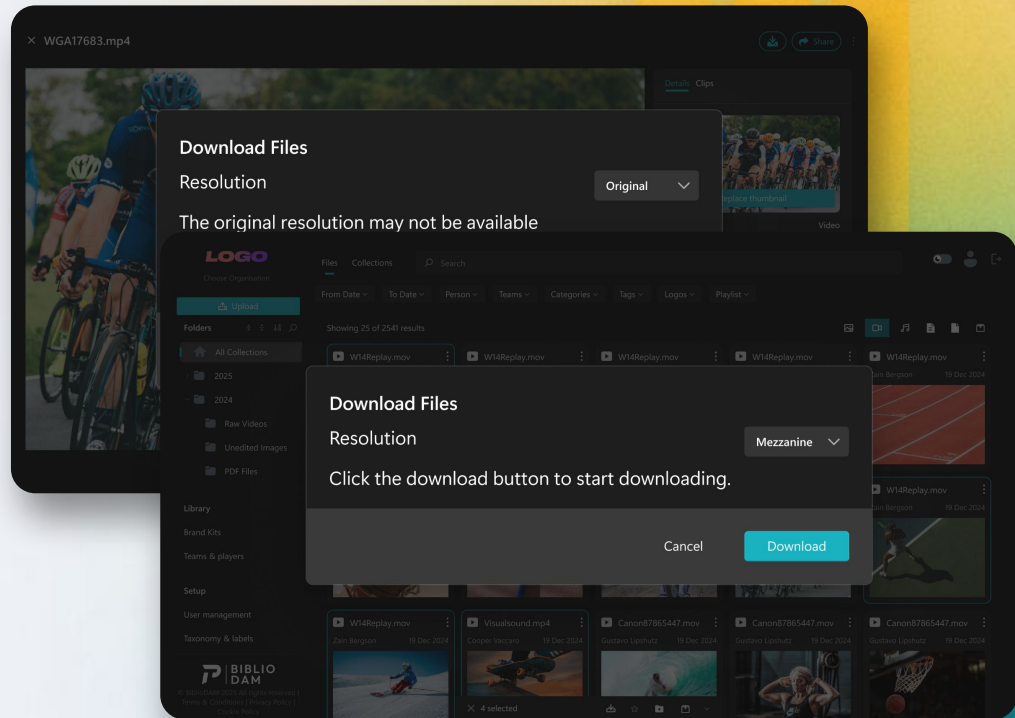

Streamline workflows with seamless FTP
and RTMP content ingestion, ensuring your
media is instantly accessible

COMPONENTS

Video transcoding

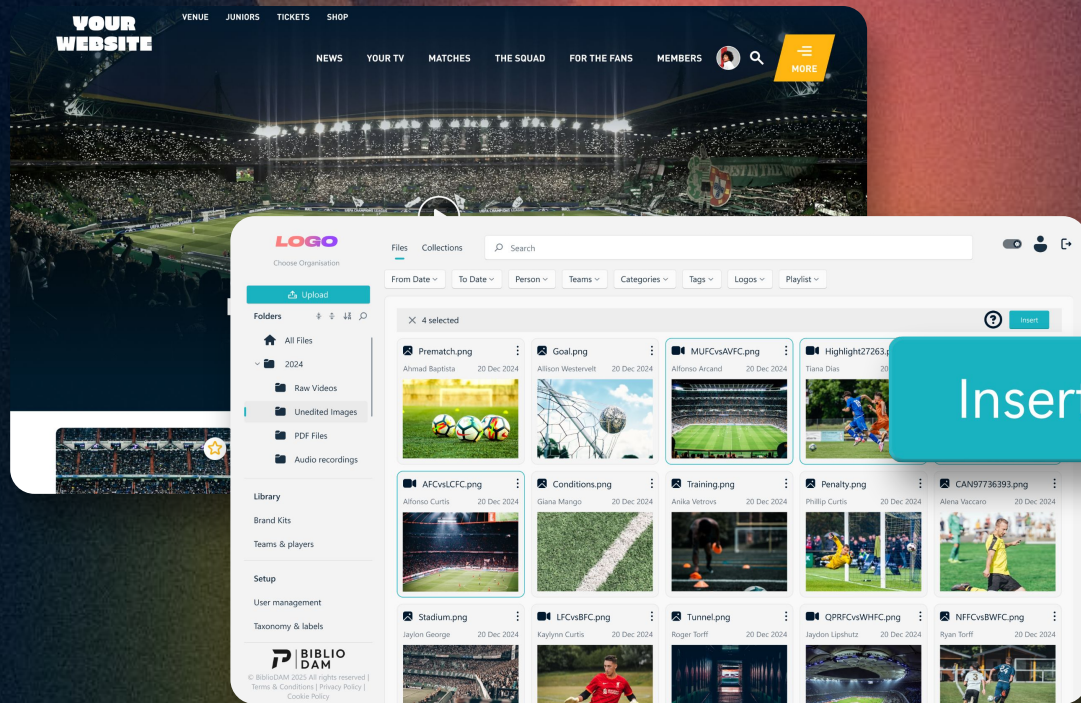

Make video assets available in multiple formats with PT's transcoding service

COMPONENTS

BiblioDAM Connect

Integrates seamlessly with PT's WebSuite Theme. Access media for your web stories, media galleries and press releases via the BiblioDAM Connect plugin and secure APIs.

COMPONENTS

Facial Recognition

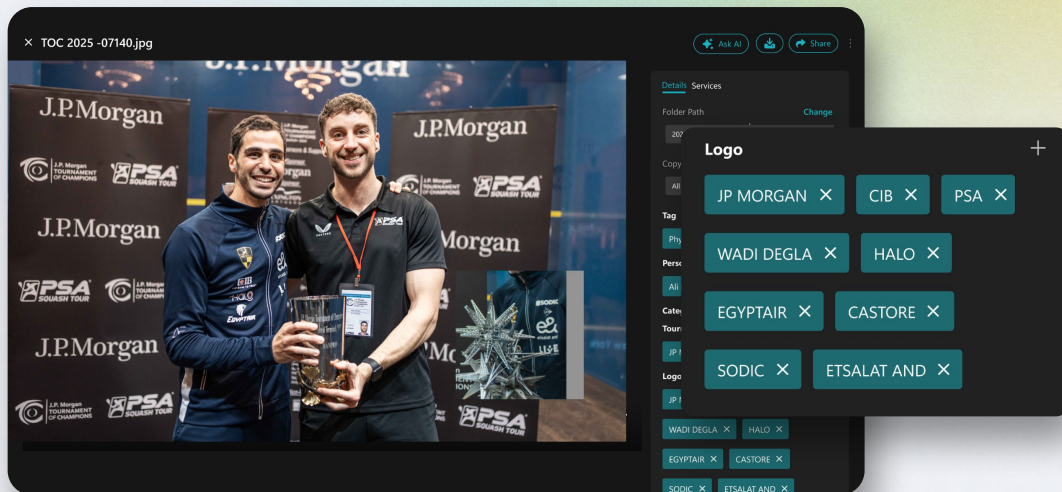

Intelligent facial recognition, allowing automatic identification of players and tagging of matching assets - streamlining content discovery and ensuring seamless access to player-specific media

COMPONENTS

Logo detection

Automatically identify and render logos in images and videos, providing valuable insights for brand visibility, sponsorship ROI, content management, and rights protection.

COMPONENTS

Auto-tagging

Tagging automation that enriches incoming media with keywords to ensure discoverability now and for the future

| ✓ Search via file path | ✓ Fine-grained permissions |
| ✓ AI-powered logo recognition | ✓ Image cropping |
| ✓ AI-powered facial recognition | ✓ Media resizing |

VIDEO MIGRATION TO AWS CLOUD

Market Feedback

"The sight of memory sticks and external hard drives holding our most precious footage used to fill me with fear that something could easily happen and we lose everything. I feel much more secure now that all of our extremely valuable footage is safe and sound!"

- Lisa Knights, Bristol Sport group head of communications

"BiblioDAM has streamlined our media workflow, making it faster and more efficient to protect, manage and share our content with key stakeholders. It's an essential part of how we deliver media assets to the right people, at the right time."

- Tecwyn Davies, Six Nations head of digital products and innovation

#TEAMTALK?
